The Instituto Canguru (IC) is a NGO established in 2002, in Brazil, whose main mission is to disseminate knowledge of inherited metabolic diseases (IMD) among health professionals and society in general, proposing initiatives in order to facilitate the access of patients to information and necessary treatments to deal with the disease. Our objectives:

- Publish information about IMD to health professionals and to population in general
- Propose initiatives that facilitate access of IMD patients to laboratory tests necessary for the diagnostic investigation and clinical follow up.
- Provide legal support to IMD patients in order to facilitate their access to proper treatments
- Survey nationwide data about IMD.

In these 5 years about to abide by our mission and objectives, many campaigns have been created and they had generated a register of families and patients with IMD. Appearing here of a demand about to accompaniment from them. We initiate therefore a systematization to accompaniment, with the creation of collect data file card than it is to is fills in on a quarterly basis by contact telephony with the relatives of the patients, and relate biannual by health services, responsible for treatment of patients in your country.

Thus we start the controls above the application of diet, medical foods and medicines that had been gotten through from the IC of the instructions to done to the responsible health services.

As soon avoiding than it is to may get any wasted, along use inadequate as of products, since the one acquisition of these by the government must be a right used inclusive for it to may be utilize this data about to reinforcement from the necessitous as of politics publishes specifies in this sanded.

## SISTEMATIZAÇÃO DO ACOMPANHAMENTO DE PACIENTES COM DOENÇAS METABÓLICAS HEREDITÁRIAS POR UMA ONG – INSTITUTO CANGURU- NO BRASIL.

O Instituto Canguru ( IC) é uma OSCIP estabelecida em 2002 no Brasil que tem como missão difundir conhecimentos sobre doenças metabólicas hereditárias (DMH) entre profissionais de saúde e a sociedade em geral, propondo ações que facilitem o acesso dos pacientes ao diagnóstico e aos tratamentos necessários. Nossos objetivos são:

- 1- Divulgação de informações sobre DMH para profissionais da área de saúde e para a população em geral.
- 2 - Proposta de ações que facilitem o acesso dos portadores de DMH aos exames necessários à investigação diagnóstica e ao acompanhamento clínico.
- 3 - Fornecimento de suporte jurídico aos portadores de DMH a fim de facilitar o acesso aos tratamentos adequados.
- 4 - Levantamento de dados nacionais sobre as DMH .

Nestes 5 anos para cumprir nossa missão e objetivos, várias campanhas foram criadas gerando assim um banco de dados de registros de famílias e pacientes com DMH. [Appearing here of a demand about accompaniment from them.
